MARK CARLO M. TOLENTINO

Junior Java Developer · Full-Stack Web

Caloocan City | 09158075439 | carlotolentino17@gmail.com

portfolio-web-carlo.vercel.app | github.com/caloyGH

SUMMARY

Junior Java Developer and Computer Engineering graduate with hands-on experience building full-stack web applications, RESTful APIs and AI-backed backend systems. Contributed to EHAI (Emergency Hotline AI), integrating Asterisk PBX, language models and a database, and now builds personal full-stack projects with Spring Boot, React/Next.js and CrewAI. Also experienced in network operations: monitoring multi-site networks and managing cloud-based network devices for high availability and performance.

SKILLS

Languages & Frameworks: Java, Python, JavaScript (ES6+), HTML5, CSS3, Spring Boot, React, Next.js, TypeScript, Tailwind CSS, Streamlit, CrewAI

APIs & Data: REST API, WebSocket, SQL, Postman, Talend, Regex, Maven, Apache Tomcat 9

AI: Multi-agent orchestration, LLM infrastructure (Groq API), context caching

Tools & DevOps: Git, GitHub, Docker, Vercel, Linux (basic server operations), PuTTY, WinSCP, python-dotenv

Networking: Ruijie Cloud, Polaris, Starlink terminals (High Performance, High Enterprise, Flat High, Mini): connectivity and bandwidth monitoring

IDEs: VS Code, Cursor, Eclipse, PyCharm, Spyder

Soft skills: Problem-solving, communication, teamwork, adaptability, eagerness to learn

WORK EXPERIENCE

NOC Technician (Contract) Nov 2025 – Jan 2026

REVLV Solutions Inc.

- Monitored DICT Free Wi-Fi project sites and multiple client networks on Ruijie Cloud and Polaris to keep availability and performance high.
- Managed Ruijie routers, switches and access points through cloud-based management systems.
- Performed Starlink terminal updates, monitored bandwidth utilization and verified connectivity of deployed sites.
- Kept accurate incident records, troubleshooting actions and network performance logs in the ticketing system; supported preventive maintenance and documented completed tasks.

Junior Java Developer May 2025 – Aug 2025

SysNet Integration Inc.

- Developed EHAI (Emergency Hotline AI), an AI system that responds to callers by voice; modified the call controller module to integrate Asterisk PBX, an LLM and database components.
- Built and tested RESTful APIs (@POST / @GET) using Postman, Tomcat 9, Talend and Git.
- Deployed services with Docker, maintained Linux servers via PuTTY, and patched JAR releases via WinSCP to ship feature updates.

Customer Service Representative (Non-voice) Jun 2021 – Dec 2023

Alorica

- Resolved customer inquiries and complaints across chat, messaging and social media, handling multiple conversations at once with clear written communication.

PROJECTS

PROYEKTO: E-Commerce & Inventory System | Full-Stack Developer Apr 2026

Personal project, built for a streetwear business

- Built a full-stack store and inventory system with Spring Boot and Vanilla JavaScript: product catalog with categories, product pages with size and quantity selection, checkout, and stock and price tracking.
- Created a password-protected admin dashboard with order logs, order status tracking (e.g. shipped, delivered, cancelled), payment types (COD, GCash, Maya) and revenue totals.
- Made the dashboard mobile-responsive and reachable over the local network (relative pathing, firewall configuration) for real-time monitoring.
- Protected database credentials and environment variables with .gitignore credential isolation; managed the full lifecycle with Git/GitHub up to cloud-ready status.

Portfolio Website | Full-Stack Developer May 2026

Personal project · Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Vercel

- Built a responsive, RPG-inspired portfolio with a character-stats window and project cards that switch from image thumbnails to video previews on hover.
- Managed Vercel deployments and fixed React lifecycle and TypeScript type errors to ship a clean, zero-error production build.

AI Branding Engine | Full-Stack Developer Ongoing

Personal project · Python, CrewAI, Streamlit, Groq API

- Developing a multi-agent platform that chains market-research and visual-design workflows sequentially.
- Added CrewAI caching to cut token usage and stay within API rate limits.
- Parse streaming LLM output with Regex modules to compile and render brand asset palettes; built a minimalist high-contrast UI with custom CSS overrides.

EDUCATION

Bachelor of Science in Computer Engineering July 2023

University of the East – Caloocan

Coursework: Data Structures, Algorithms, Software Engineering, Database Management Systems, Web Development.
